

apollon series

There are 4 templates under apolon series, -apollon,oulios,loxias,foivos - each of them with a different color variant.

Features:

- Free templates under GNU GPL
- Compatibility Joomla! 1.0.x versions
- Valid W3C xhtml 1.0 and css
- Liquid/Float design.Can be scaled to any resolution from 800x600 to 1280x1024 and more
- 2 columns layout. Left bar for site navigation, enough space for main content
- Left bar consists of all modules in the original left and right positions
- Left bar uses the moofx javascript platform,for nice drop-down effects
- user1,user2,user5,user6 positions use round corner technique for the outpouting modules
- Text resizer

The templates use some custom module positions, so please read the associated README.txt file for a proper setup.
